Equity is Quality
kua takoto te manuka

Healthcare quality the degree to which **health care services** for individuals and populations **increase** the likelihood of **desired health outcomes** and are consistent with current professional knowledge

"**Health equity**" or "equity in health" implies that ideally **everyone** should have a **fair opportunity** to attain their **full health potential** and that no one should be disadvantaged from achieving this potential

Quality in Healthcare

Safe

Timely

Patient Centered

Effective

Efficient

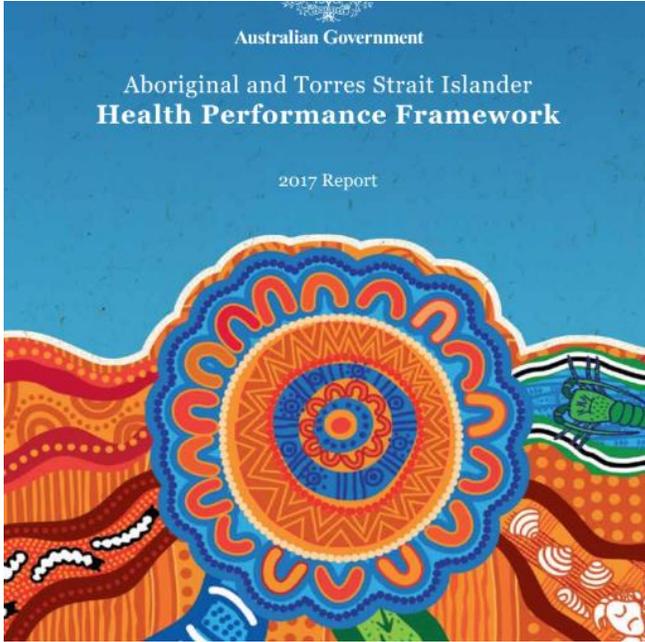

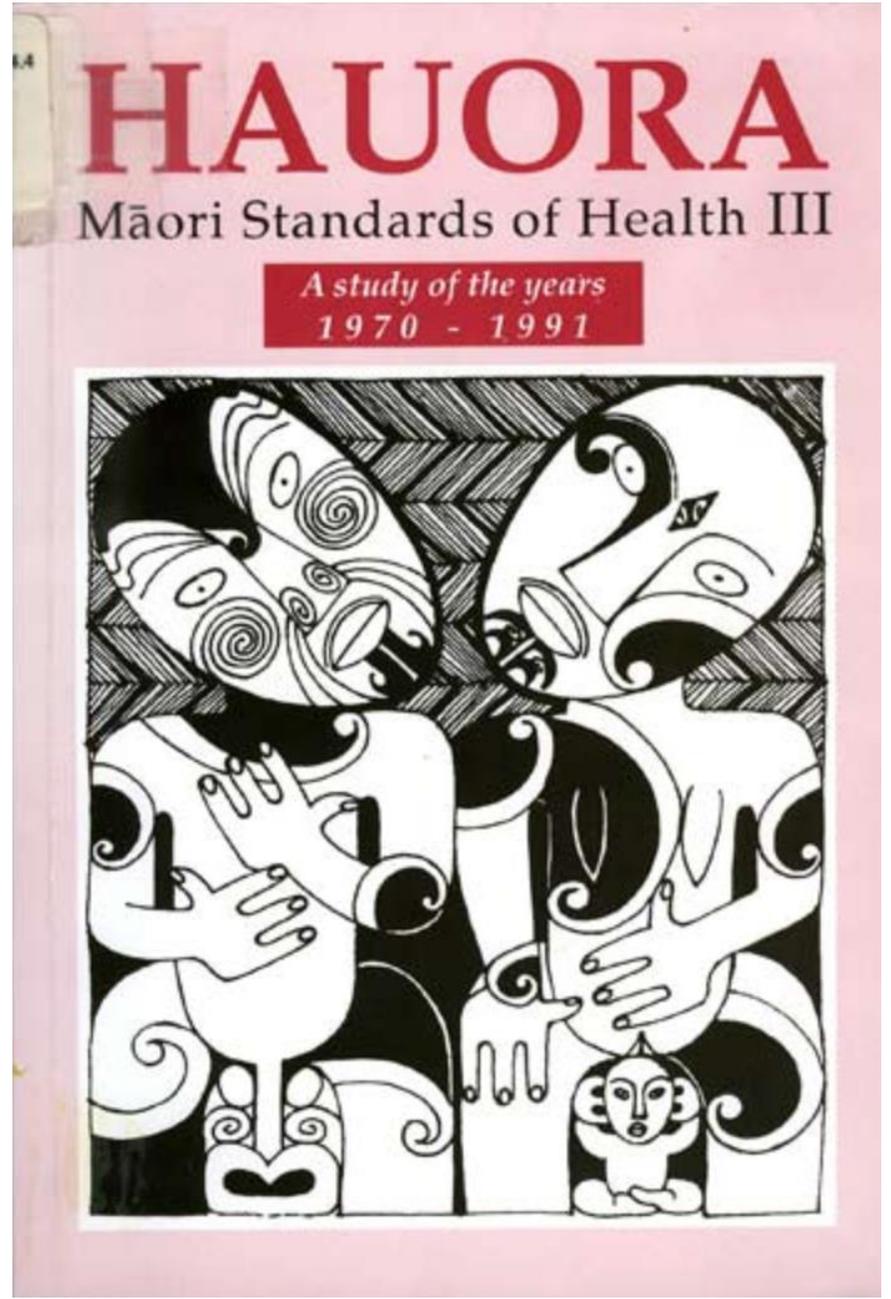

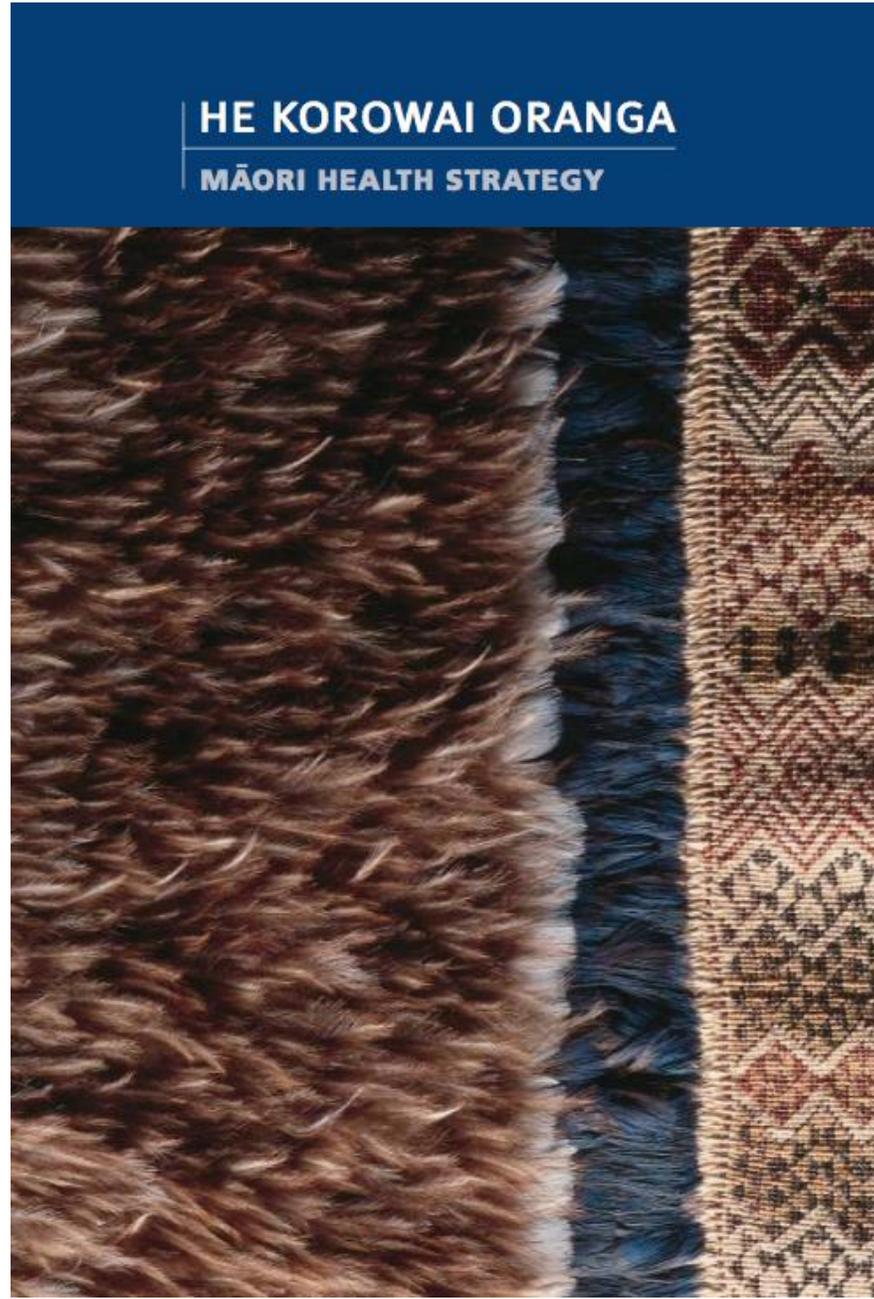

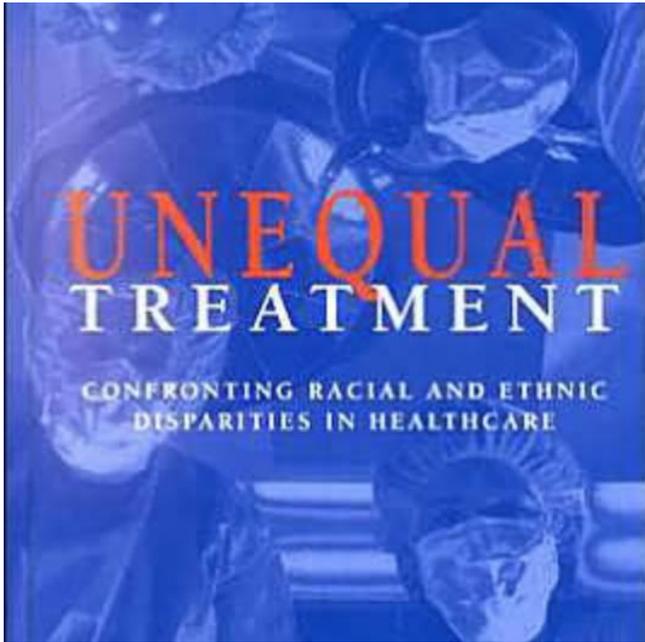

Equitable

Equality

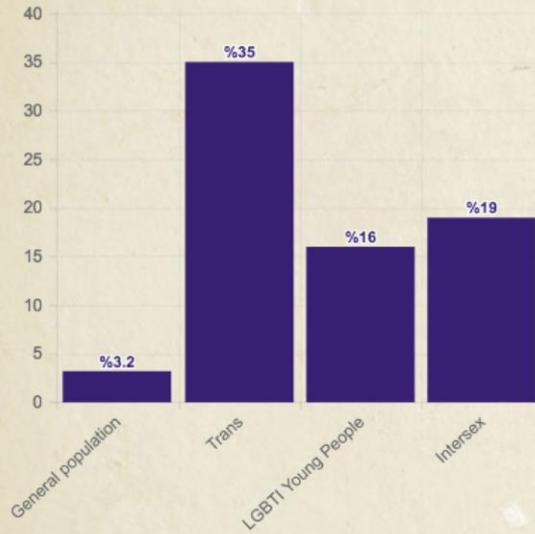

Equity

Suicide attempts per population group

When compared with the general population, LGBTI people are more likely to attempt suicide

Māori children have high rates of hospitalisation due to assault, neglect, and maltreatment.

26

Māori children per 100,000.

23

Pacific children per 100,000.

6

Asian/Indian children per 100,000.

11

European/Other children per 100,000.

In the USA, African Americans represent **13%** of the population but account for nearly **HALF** of new HIV Diagnoses

Global life expectancy gaps

Country	Indigenous Group	Indigenous Life Expectancy	Non-Indigenous Life Expectancy	Gap (years)
Cameroon	Baka	35.5	57	21.5
Kenya	Maasai	43.5	56.6	13.1
Canada	Inuit	68.5	81	12.5
Australia	Aboriginal or Torres Strait Islander	71.4	81.4	10

Why is Equity in healthcare good?

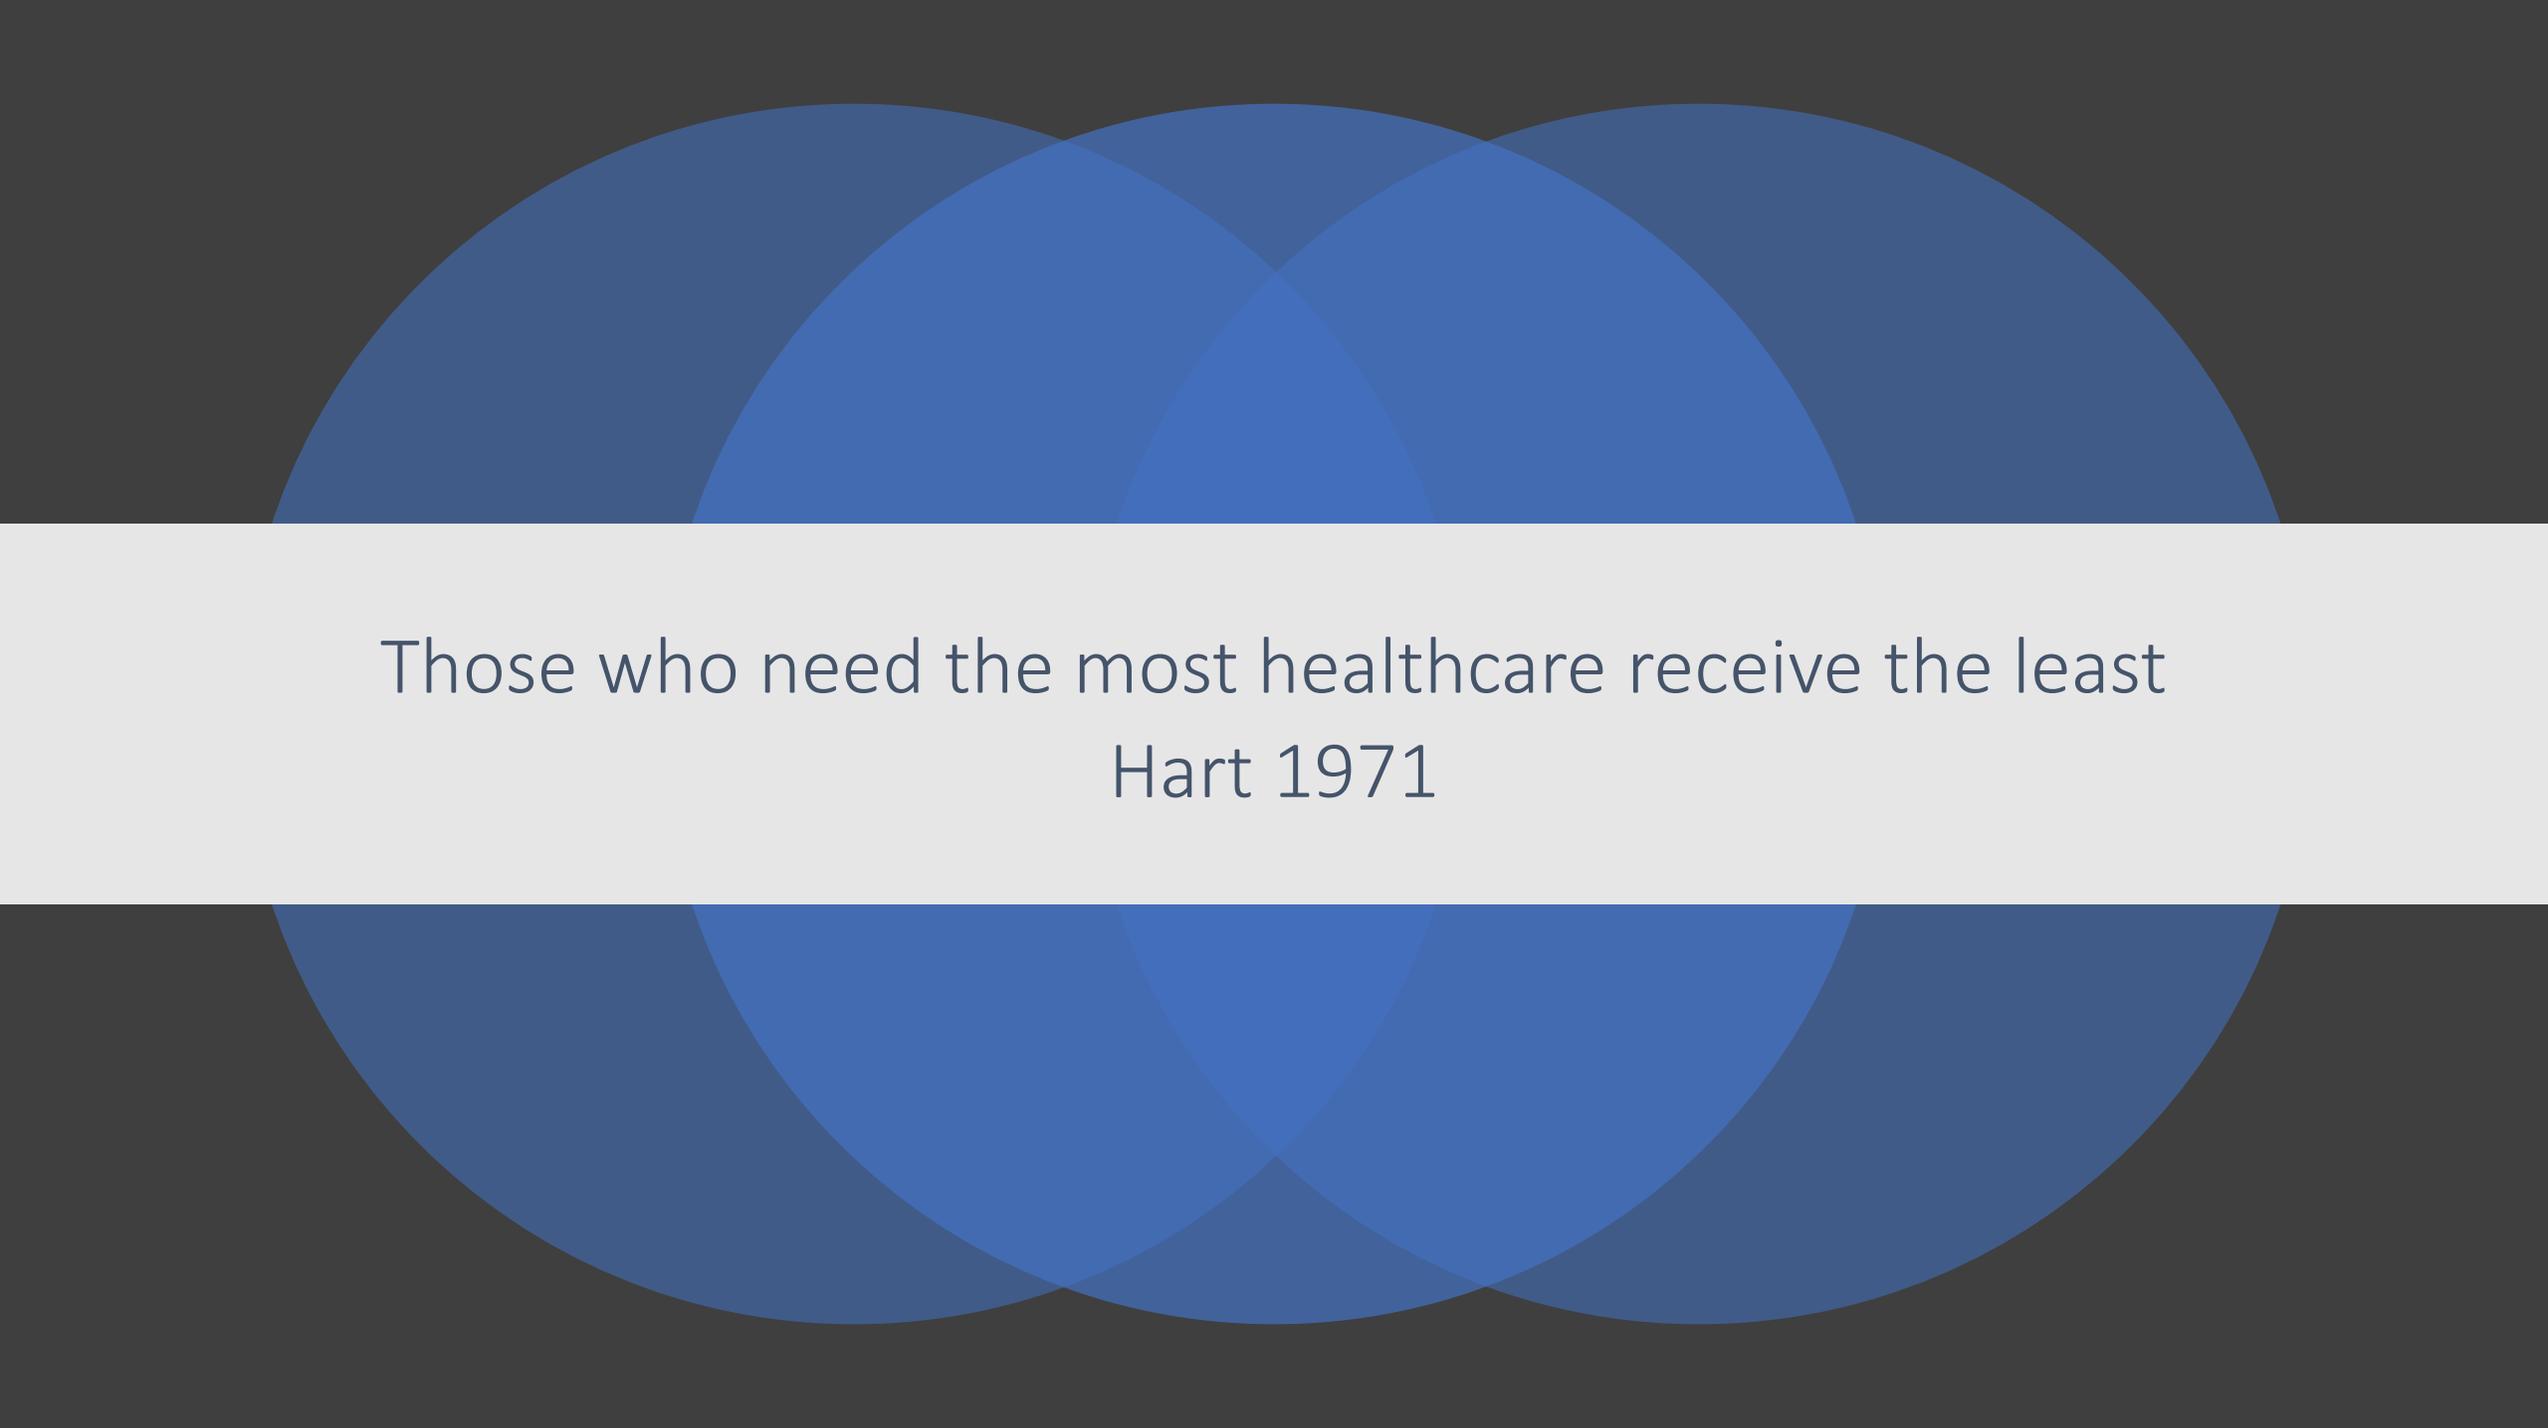

It is morally right

It saves money

- **directly costs** the NHS about **£5 billion** per year
- **directly costs** the Canadian Government **\$6.5 billion** per year

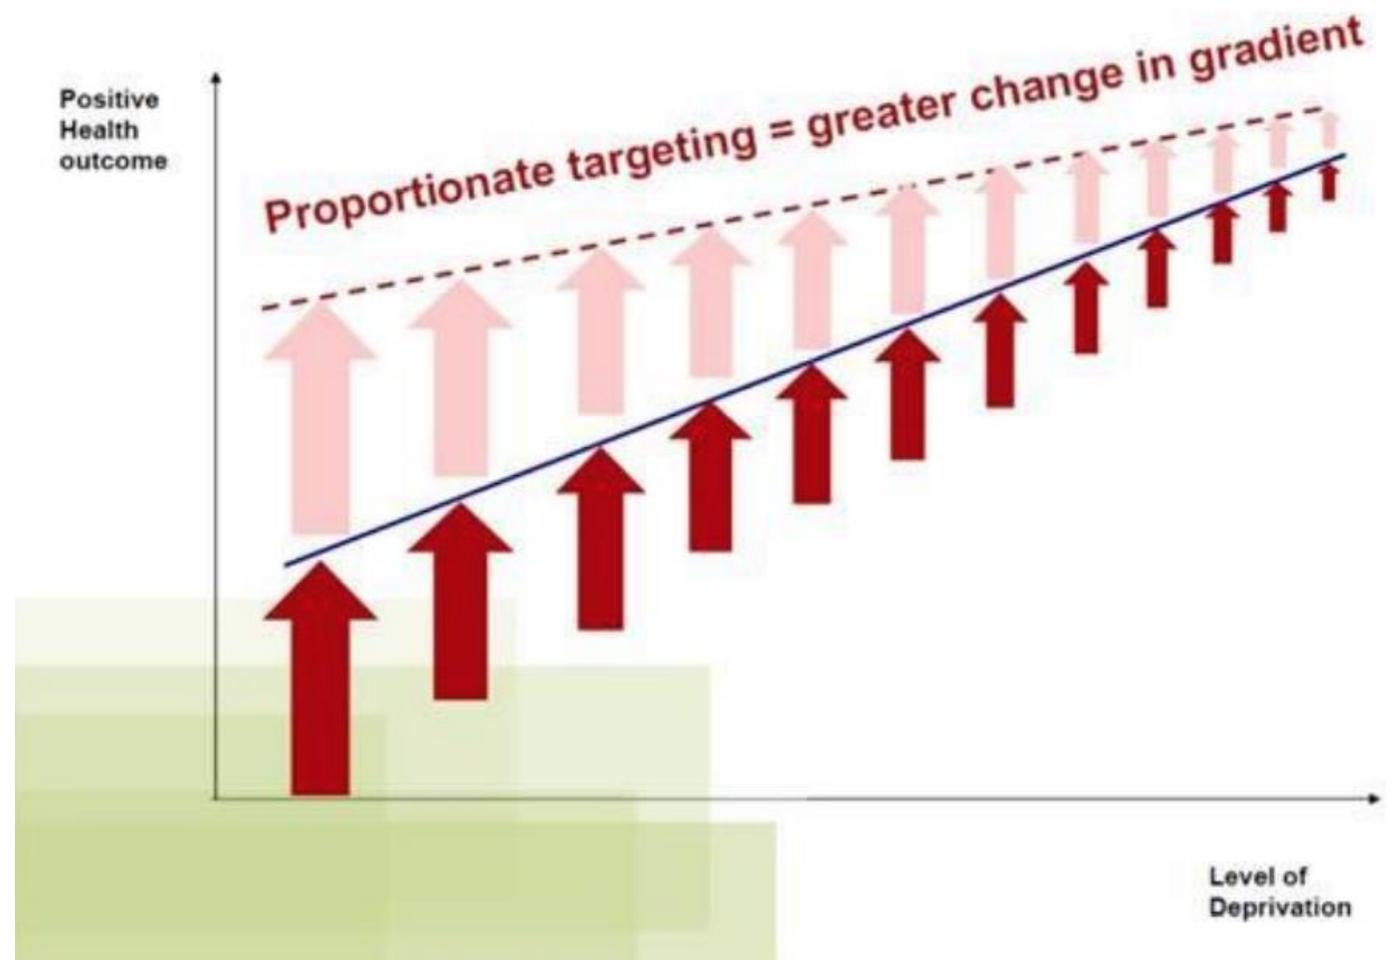

It Improves Quality

- Safety
- Timely
- Efficiency
- Patient centric

Those who need the most healthcare receive the least

WHAT IS HEALTH IN ALL POLICIES?

Good health requires policies that actively support health 

It requires different sectors working together, for example:

HEALTH

TRANSPORT

HOUSING

WORK

NUTRITION

WATER &
SANITATION

TO ENSURE ALL PEOPLE HAVE EQUAL OPPORTUNITIES TO ACHIEVE THE
HIGHEST LEVEL OF HEALTH

50% of reduction in child mortality
from 1990-2010 was from non
Health Sector Investment

Health System

- Easy to access and navigate as a patient
- No inherent bias for those with limited English proficiency
- Objectively shown to be easy to navigate

Care process Variables

- Bias
- Stereotyping
- Discrimination
- Poor communication

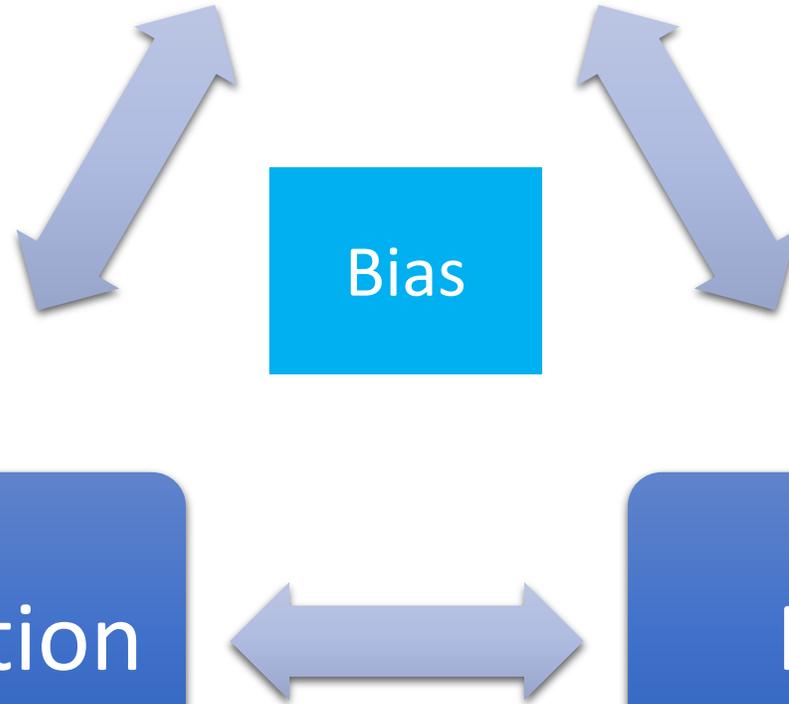

Stereotyping

Bias

Discrimination

Prejudice

Patient Level Variables

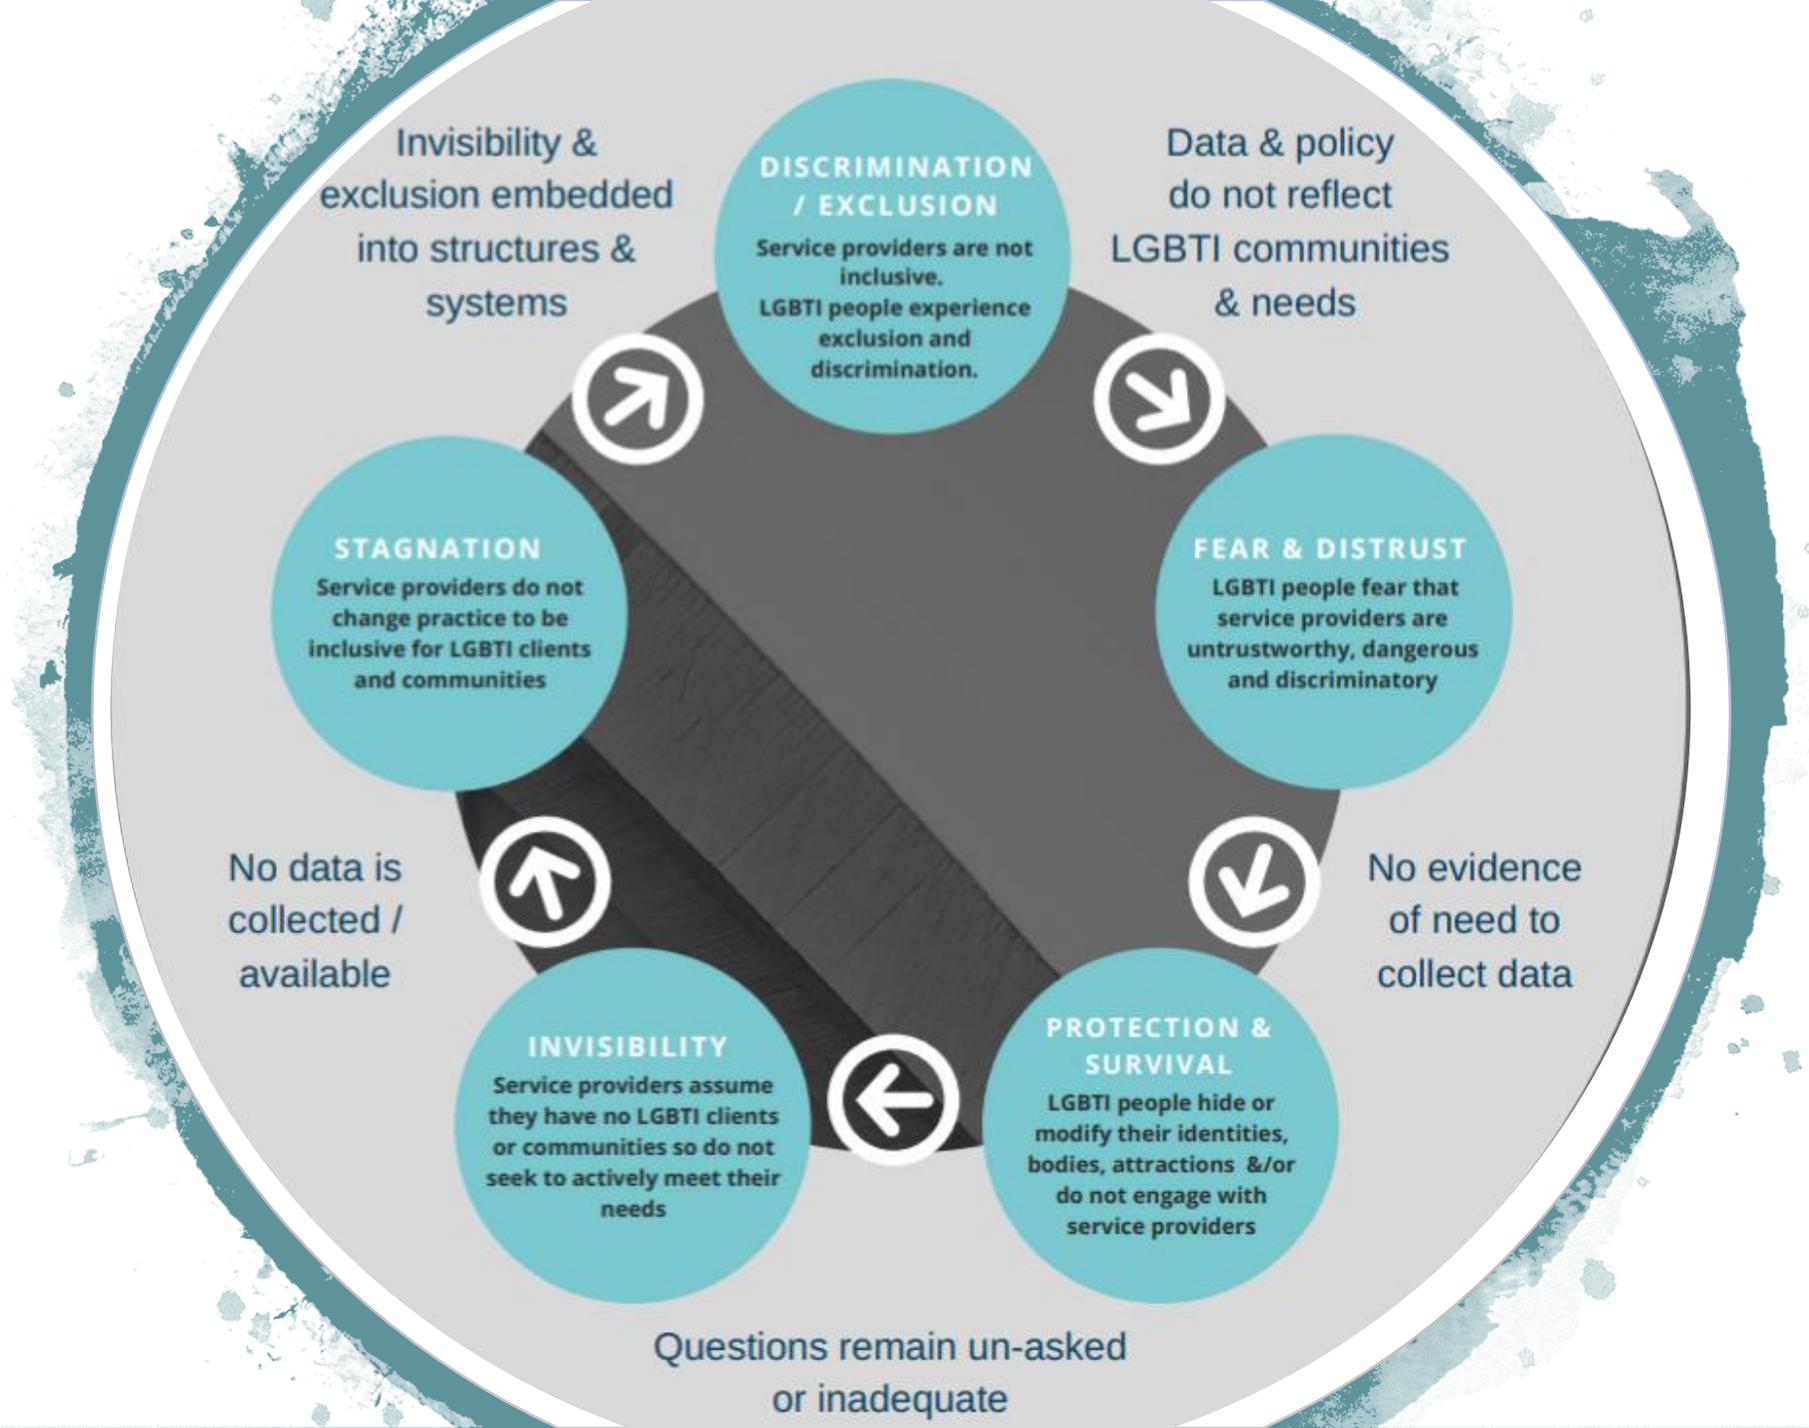

UNDERSTANDING

MISTRUST OF THE
SYSTEM

ADHERENCE TO
THERAPY

Invisibility & exclusion embedded into structures & systems

Data & policy do not reflect LGBTI communities & needs

DISCRIMINATION / EXCLUSION

Service providers are not inclusive.
LGBTI people experience exclusion and discrimination.

FEAR & DISTRUST

LGBTI people fear that service providers are untrustworthy, dangerous and discriminatory

PROTECTION & SURVIVAL

LGBTI people hide or modify their identities, bodies, attractions &/or do not engage with service providers

INVISIBILITY

Service providers assume they have no LGBTI clients or communities so do not seek to actively meet their needs

STAGNATION

Service providers do not change practice to be inclusive for LGBTI clients and communities

No data is collected / available

No evidence of need to collect data

Questions remain un-asked or inadequate

Improving Quality and Achieving Equity: A Guide for Hospital Leaders

Make a Change

Getting Started

- Form a taskforce or work group
- Current state of play within organization
- Educate leadership

Creating Foundation

- Collect the data
- Policy
- Community Engagement
- Hospital Education
- Strategic goals

Moving to Action

- Monitor for disparities
- Develop Pilot plan

Evaluate, Disseminate, Re-Engineer

- Evaluate against goals
- Present data to Governing body
- React to feedback and change as necessary

Health Care Quality is an objective measure how well we take care of patients

Certain groups of people have higher rates of disease with less intervention

Diverting resources to these groups improves quality performance measures and improves outcomes (win-win)

Take home

The physicians surely are the
natural advocates of the poor, and
social problems largely fall within
their scope

Rudolf Virchow
